**Thompson, Mike(D-CA) - Community Project Funding Requests**

<b>ID</b>	<b>Request Project Name</b>	<b>Recipient Name</b>	<b>Request Member's Request (in thousands, \$000)</b>
492	Beale AFB- Multi-Domain Operations Complex	Beale Air Force Base, California	\$182,300

Request ID: 492			
Project Name:	Beale AFB- Multi-Domain Operations Complex	Request Nature:	Community Project Funding
Member Name:	Thompson, Mike(D-CA)	Member's Request: (in thousands, \$000)	\$182,300
Justification:	<p>Building 1086 was designed and constructed in an ad-hoc fashion beginning in 1959. It is severely degraded, with a building condition index of 70 and has documented Fire Safety Deficiencies due to no mass notification and lack of fire suppression. Building 1086 also has multiple Risk Assessment Codes in regards to electrical issues, egress noncompliance, and asbestos. This facility does not have the structural or infrastructural capabilities to support emerging technologies and their associated power and cooling requirements. Readiness for the mission is impeded due to separation of maintenance (Building 1086) and training &amp; operations (Building 1025). A demolition and renovation project for portions of the building have been programmed for Building 1086 in the Facilities, Sustainment, and Restoration Program for Fiscal Year 2027. These aging facilities supporting the high-altitude Intelligence, Surveillance, and Reconnaissance program at Beale are designed for the 1960's era and cannot meet mission needs. Beale Air Force Base is the only base delivering globally integrated intelligence, surveillance, and reconnaissance in support of National Defense Objectives. IMPACT IF NOT PROVIDED: The Air Force will be unable to support the modernization of the 1960's Cold War era infrastructure and the incorporation of next generation technologies will be further delayed. Geographically dispersed functions will continue to cause inefficiencies in daily operations. Personnel in Building 1086 will continue to work in an unhealthy, unsafe environment with numerous Fire Safety Deficiencies and Risk Assessment Codes.</p>		
Project Purpose:	<p>Beale Air Force Base is home to the only high-altitude Intelligence, Surveillance, and Reconnaissance Wing in the Air Force that provides decision advantage and</p> <p>combat power worldwide to meet the nation's call. With the high-tempo and essential mission Beale Air Force Base provides to the Air Combat Command and</p> <p>combatant commanders, it is important to have the tools and personnel necessary to meet the specific and essential requirements in a timely and safe manner. The</p> <p>Multi-Domain Operations Complex provides full-spectrum Command and Control readiness and optimizes worldwide manned high-altitude reconnaissance and multidomain.</p> <p>The Multi-Domain Operations Complex will provide space for the highaltitude Intelligence, Surveillance, and Reconnaissance mission planning cell, which has grown by 117 personnel, space to implement emerging technologies (artificial intelligence, multi-domain operations, 5th Generation) and will integrate current Intelligence, Surveillance, and Reconnaissance platforms, sensor maintenance, and flight operations, improving high-altitude reconnaissance operational efficiency. This project allows for the implementation of next generation high altitude reconnaissance sensors and for the addition of theater wide Command and Control functions to high-altitude aircraft. This project is required to divest ~72% of Building 1086, a cornerstone of Beale's long-range facility strategy, and to provide a purpose-built facility, complete with information technology architecture, power, and building systems required to support current and future mission requirements. This is not a tenant or supported service requirement.</p>		
Project City or County:	Yuba County	Project State:	CA
Recipient Name:	Beale Air Force Base, California	Recipient Mailing Address:	Beale Airforce Base, California

The Honorable Mike Rogers  
Chairman  
Committee on Armed Services  
U.S. House of Representatives  
Washington, D.C. 20515

The Honorable Adam Smith  
Ranking Member  
Committee on Armed Services  
U.S. House of Representatives  
Washington, D.C. 20515

Dear Chairman Rogers and Ranking Member Smith:

I respectfully request funding for the Beale Air Force Base Multi-Domain Operation Center in the fiscal year 2027. The entity to receive funding for this project is Beale Air Force, located in Yuba County, California.

The funding would be used for the construction of a new two-story Multi-Domain Operations Complex to consolidate aircraft maintenance, training, and mission planning for high-altitude ISR. This multi-functional facility will house two maintenance docks and three squadrons, integrating flight operations with sensor maintenance and emerging technologies like AI. By streamlining space for 117 additional personnel and optimizing command-and-control readiness, the complex ensures Beale Air Force Base can meet high-tempo mission requirements with increased operational efficiency.

The project has a federal nexus because the requested funding would be for purposes authorized by 10 U.S.C. Chapter 169.

I certify that neither I nor my immediate family have any financial interest in this project.

Sincerely,

---

Mike Thompson  
Member of Congress
